

Vision

Our vision: Students will

- be confident, connected, actively involved, and lifelong learners who will value and pursue excellence.
- be creative, energetic, and enterprising
- seize the opportunities offered by new knowledge and technologies to secure a sustainable social, cultural, economic and environmental future for our country
- work to create an Aotearoa New Zealand in which all cultures, particularly the indigenous Maori culture are valued for the contributions they bring
- in their school years, continue to develop the values, knowledge, and competencies that will enable them to live full and satisfying lives

Learning for Knowledge

- Celebration of Diversity
- Respect
- Community and Participation

- Innovation, Inquiry and Curiosity
- Care for the Environment

- Integrity

Key Competencies

- Using Language, Symbols and Text

- Relating to others
- Participating and Contributing

- Thinking

- Managing Self

Academic Success

Students will be provided with the opportunities to strive for excellence in their chosen learning pathway across the eight learning areas. They will be equipped with the breadth of knowledge and skills to meet the demands of the real world now and in the future. The delivery will be flexible to provide a variety of subject and career pathways to meet their individual needs. Valid, fair and consistent assessment programmes will be in place to accurately measure achievement, and provide opportunities for further learning.

Respectful Relationships

Students will live and learn collaboratively valuing diversity, community and a sense of belonging in the college. They will have a generosity of spirit so that learning, individuals and property will be respected in a tolerant, co-operative, caring and honest way. Unique talents and individuality will be celebrated in a safe physical, emotional and social environment.

Learning How to Learn

Students will be encouraged to be confident, reflective, independent learners who have a sense of curiosity and engagement in the learning process. They will have well developed thinking skills and the ability to apply the learning process and what is learnt so that they are able to continue to learn throughout life.

Valuing Individuality

Students will strive to become resilient, confident people who will actively seek, use and create knowledge. They will have a strong sense of their own personal identity and values with the strength of character to make logical and reasoned decisions. Achievements will be celebrated with pride and humility. Individuals will positively contribute to the community in a wide range of life contexts.
